Hardcore genre dominators **TRAPPED UNDER ICE** and **GOOD FIGHT MUSIC** are pleased to announce the upcoming physical and digital release of the band’s new full-length album, *Big Kiss Goodnight*. The album drops on October 11th, 2011 and boasts production credits from **New Found Glory**’s Chad Gilbert. **REAPER RECORDS** is partnering with **GOOD FIGHT MUSIC** on the launch and is scheduled to release a special vinyl version of the record.

“You know what it is; **TRAPPED UNDER ICE**, Chad Gilbert, and Paul Miner up in the studio recording the hardest TUI record to date, *Big Kiss Goodnight*,” states guitarist Sam Trapkin. “We hope ya’ll are familiar with the mosh pit because that’s what this thing is about.”

TRAPPED UNDER ICE is currently hard at work on a brand new Tumblr page, created to keep fans updated throughout the recording process as well as up to and beyond the release of *Big Kiss Goodnight*. Fans are encouraged to submit content directly to the new page, which can include anything from **TRAPPED UNDER ICE** tattoos, pictures from shows and events, and more. The band will randomly pick fans that have submitted content to win prize packs including autographed CDs, merch, and other items.

TRAPPED UNDER ICE came together as a group in Baltimore, MD in 2007. Shortly after, the band released a five track demo, which was also released as an EP on Flatspot Records. After hearing the demo songs, the crew at REAPER RECORDS approached the band with a deal to release what would become known as the *Stay Cold* EP in April 2008, a record that some say marked a milestone in the evolution of contemporary hardcore. The band then went on to tour in support of the EP with their brothers in arms **Trash Talk**, and later with **The Mongoloids**, **The Carrier** and **Bitter End**.

Continuing where the *Stay Cold* EP left off, the band released their 2009 full-length debut, *Secrets Of The World*, a twelve track beating that is considered by many to be the top hardcore record of that year. Recorded in early 2009 by Dean Baltulonis at The Wild Artie studio in Queens, New York, frontman Justice took a super personal approach, using his life experiences as an allegory to the decaying urban society surrounding him. After the release of the album, the band toured in Europe with **Terror** and **Born From Pain**, and later joined IndieMerchStore.com's "10 for \$10 Tour" with **Poison The Well**, **Madball**, **Bane**, **Vision Of Disorder**, **Terror**, **Death Before Dishonor**, **War Of Ages**, **Crime In Stereo**, **The Mongoloids**, and **This Is Hell**.

The band plans to hit the road on a United States headline tour in the fall to support *Big Kiss Goodnight*. Stay tuned for upcoming details about tour dates.
