**Kinematic Entertainment**, in cooperation with AetherWax Records, has recently unleashed the new album from Florida-based progressive metallers **MINDCAGE** entitled **OUR OWN DEVICES**.

Mixed and pre-mastered by rock legend **Michael Wagener** (**METALLICA**, **OZZY OSBOURNE**, **SKID ROW**, **DOKKEN**, **RAVEN**, **MEGADETH**), **OUR OWN DEVICES** is a fantasy storybook set to music. Combining cultural and literary elements of steampunk, dystopian society and futuristic technologies with highly articulate progressive metal music, the album transports the listener to a world broken and needing a hero. That oppressive world is devoid of arts, creativity, light, and ultimately, humanity. But from it springs an enigmatic character, Arabella Vash, who is called to The One Constant, a group of rebels who maintain the history and teachings of the last free society.

The core members of **MINDCAGE** — **Dietrick Hardwick** (guitar), **Brian Howell** (bass) and **Craig Nudo** (drums) — have been connected personally and through music for almost thirty years. The significance of this project, for them, is that a lifelong goal has come to fruition. With the addition of power vocalist **Jeff Hignite**, the intense and unique synergy of writing and performing became apparent.

The band recently debuted **OUR OWN DEVICES** and the first official video single Mindcage "**The Human Race**" to the public on at the **ProgPower USA XIV** festival in Atlanta, Georgia to an ecstatic reception.
